Entry Point (Startup Scripts) \*

Note: Enter one command per line. For multi-process Agent/MCP Deployment (like ChatGPT Apps Solar System), Include both the build and run commands. The last line should be MCP/Agent server running command starts with uvicorn,python,pnpm,npm,etc. Don't include any --port flags, it will be assigned automatically.

pnpm run build  
pnpm run serve &  
uvicorn solar-system\_server\_python.main:app
